Art Unit: 2614

This application is in condition for allowance except for the presence of claim 43 directed to the method of analyzing VoIP calls non-elected without traverse.

Accordingly, claim 43 has been cancelled.

### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose applicant's device that analyzes signals from a packet network/Internet and signals from a circuit network/PSTN, and that device will generate records about calls that traverse both the packet switched and circuit switched networks. A database will then calculate statistics describing the traffic that traversed both the packet and circuit networks. No obvious combination of references found would have taught one of ordinary skill in the art to make and use applicant's system and method as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Creighton H. Smith whose telephone number is 571/272-7546. The examiner can normally be reached on M-F, alternate Fridays off.
